

Woof-Meow - Pet Sitting Service Platform Flutter App

Last Updated : 30-03-2023

By : [193192 & 193101](#)

Woof-Meow is a full application template of Pet Sitting Service Platform Flutter App. Online community for pet sitters. The online platform enables pet owners to find a housesitter to care for their property and pets while they are away from home. Sitters will take care of home and pets, after you agree the service and provide the service fee if needed. If you are interested to develop your own Pet Sitting Service Platform Android and iOS app, Woof-Meow is perfect for you...

Requirements

To customised this project you should have Flutter and Dart installed and configured effectively on your gadget [Install Flutter](#)

Set up your editor Install the [Flutter and Dart Plugins](#).

- Unzip the files folder and open it. There have source code name as Woof-Meow-source-code, then use your preferred IDE ([Android Studio](#) / [Visual Code](#) / [IntelliJ](#)) to open the project.

For Android Configuration

Get Dependencies:

1. Run the command:

```
flutter pub get
```

Change Package Name:

1. If you want to change the package name following the next steps
2. Open `/android/app/build.gradle` and change the package name

```
defaultConfig {  
    applicationId "" // this is the package name  
    minSdkVersion 25  
    targetSdkVersion 33  
    versionCode flutterVersionCode.toInteger()  
    versionName flutterVersionName  
    testInstrumentationRunner "android.support.test.runner.AndroidJUnitRunner"  
    multiDexEnabled true  
}
```

3. Open `/android/app/src/main/AndroidManifest.xml` , `/android/app/src/profil/AndroidManifest.xml`, `/android/app/src/debug/AndroidManifest.xml` and specify your:
4. Open `/android/app/src/main/kotlin/MainActivity.kt` and change the package name
